computer science

University-Gazafinal 2017 Profit of Engineering &IT Of Questions: 4 Questions

Question Paper 50 Points

Course Name: CS

Second semester: 2016/2017

10-05-2017 Time: 120 minutes

dion 1: Mark ☑ for True statements and ☒ for False statements: (15 Marks)

A processor contains small, high-speed storage locations, called transistors, that emporarily hold data and instructions

Information is a collection of unprocessed items, which can include text, numbers, images, audio.

Current processors include advanced transfer cache, a type of L3 cache built directly on the processor chip.

Open source software is mass-produced, copyrighted retail software that meets the needs of a wide variety of users, not just a single user or company.

The speed of the system clock is just one factor that influences a computer's

performance. Read-only memory refers to memory chips storing temporary data and instructions.

A Dual-core processor is a chip with two separate processor chip.

Utility program allows a user to perform maintenance-type tasks usually related to managing a computer, its devices, or its programs

A Pixel is the smallest element in an electronic image.

A touchpad is a small, flat, rectangular pointing device that is sensitive to pressure and

Information on a display device sometimes is called hard copy motion.

Brightness describes the difference in light intensity between the brightest white and

darkest black that can be displayed on an LCD monitor.

An impact printer forms characters and graphics on a piece of paper without actually

Formatting is the process of dividing the disk into tracks and sectors A External hard disk is a separate, freestanding hard disk that connects with a cable to a

port on the system unit or communicates wirelessly.

7	Program that finds Web sites Wat	25 700	
1	program that finds Web sites, Web pages, images, videos, news, programs designed to make users	Mark	s)
1	programs designed to make users more productive topic	1	Database
	them with personal cases.	-	
-	is a small ceramic or metal component with fins on its surface components such as a processor?	2	Access time
1	components such as a processor?	3	2
	Uses one transistor for each pixel of LCD monitor. The time in milliseconds (ms) the size of LCD monitor.		Response time
	The time in milliseconds (ms) that it takes the display screen to	4	PictBridge
	turn a pixet on or ori.	5	
	envides connections to a component of the system	IT:	Search engine
	Collection of data organized in a manner that allows access,	6	User response
I.	Is the amount of time it takes	7	A smart card
	instructions, and information from memory.	8	PDF
	Occurs when a read/write head touches the surface of a platter on a hard disk	9	Pointing stick
	Allows the various devices both inside and attached to the system unit to communicate with each other.	10	
K.	Pressure-sensitive pointing device		Disk controller
		11	Data collection device
_	circles or rectangles	12	A backup
M.	That control the transfer of data, instructions, and information from a disk to and from the system bus and other components of the computer	13	A CONTRACTOR OF THE PARTY OF TH
N.	is the delivery of education at one location while the learning takes place at other locations	14	1.5
0.	Is an instruction a user issues by replying to a question displayed		nezi sink
P.	oy a program	15	APPLICATION SOFTWARE
•	Is a duplicate of a file, program, or disk placed on a separate storage medium that you can use in case the original is lost, damaged, or destroyed.		, see a
Q	Allows you to print phase directly from a finitel or and	-	
R.	Allows you to print photos directly from a digital camera Obtains data directly at the transfer of the transf	4	كثية الصيدلة
10	Obtains data directly at the location where the transaction or event takes place.		Faculty of Pharmacy
1/2	Stores data on a thin microprocessor embedded in the card	7	
-	Popular file format that document management software uses to save converted documents.		

The same	0.5125	
- Appli	of	03.
